NURSING RESEARCH

INDEX TO VOLUME 18 **JANUARY TO DECEMBER 1969**

This index is in two sections: the first is an index to **Articles, Briefs, Research Reporter,** and **Researcher's Bookshelf** and the second is an index to the **Abstracts.** Both sections are arranged in two parts, subject and author. The subject parts are arranged alphabetically by subject, and geographic location of the institution or agency in which the study was made. Geographic entries are by name of state or country and then by name of city. The author parts are alphabetical by surname of author. The volume and page number is indicated after each entry and in the **Abstract Index** it is immediately followed by the number of the abstract, for example 18:94(71). The following abbreviations are used: (ed)—editorial; (bk rev)—book review; (exc)—excerpt; (RR)—Research Reporter.

Note that the subject headings are the same as those used in the **International Nursing Index** and are based on the *Medical Subject Headings* published by the National Library of Medicine. A "Nursing Thesaurus," which lists nursing headings commonly used with referrals to the headings used in INI and in the annual indexes of **Nursing Research, Nursing Outlook** and **American Journal of Nursing,** is published each year as part 2 of the first issue of INI and is bound in the fourth and cumulated hard cover issue. Copies of this Thesaurus are available upon request from the American Journal of Nursing Company.
